

Logan J. Olding

Dunedin, New Zealand

022 090 8669 | oldinglogan@gmail.com

Professional Summary

Third-year Bachelor of Information Technology student with a strong interest in Linux systems, networking, and IT infrastructure. Experience gained through coursework and personal technical projects, including a self-built Debian Linux homelab created as a technical challenge and space for experimentation. Comfortable working in Linux command-line environments, troubleshooting system and network issues, and learning new technologies through hands-on exploration.

Education

Bachelor of Information Technology (Third Year)

Otago Polytechnic, Dunedin

- Networking, Operating Systems, Programming
 - Systems Administration, Databases
-

Technical Skills

Linux Administration

- User/group management, permissions
- SSH, systemd, APT package management
- System updates, logs, troubleshooting

Networking

- TCP/IP, DNS, DHCP
- Firewalls, SSH, ZeroTier
- Basic network troubleshooting

Scripting

- Bash, basic PowerShell, C#, C++

Systems & Tools

- Debian, Ubuntu, Windows 10/11
- Git, VS Code

Cloud

- Basic familiarity with AWS and Microsoft Azure
-

Technical Projects

Linux Homelab (Debian)

Maintain a personal Debian Linux server built as a technical challenge and actively used for ongoing experimentation and system testing.

- Remote administration via SSH and ZeroTier
- Service configuration and system maintenance
- User management and permissions
- Troubleshooting networking and service issues
- Documentation of configurations and fixes

Game Server Administration

Hosted and maintained personal Linux-based game servers for learning purposes.

- Java runtime configuration
 - Wine-based application support
 - Server configuration management
 - Debugging network and application issues
-

Soft Skills

- Troubleshooting and analytical thinking
- Communication and documentation
- Time management and prioritisation
- Self-learning and adaptability
- Teamwork and collaboration
